

Custom organizing systems are an ideal way to create extra storage space for any room in the house.

**F**orm follows function. That certainly holds true when you compare the advantages of a custom closet. You'll be amazed at how little time and effort it takes to get organized.

Normally, closets will serve as storage space for the life of your home. It is always a good idea to maximize their efficiency. Just bring your imagination and you can transform a space in less than a weekend. All you need is a workable plan. The first step is to determine your needs and budget.

### Basic Systems

At the basic level you can put together a group of reasonably priced storage pieces and components that can be purchased at a store or thru a catalog.

These items are usually made of canvas and plastic and can be assembled in a matter of minutes. This is a start towards getting your clothes, shoes and accessories in order. Remember to make your wardrobe manageable and either fix, donate or discard things you no longer use.

### Mid-Level Closets

In the mid-level range you can have a strong wire grid system that gives you more durability, flexibility, and features. Ventilated shelving offers increased air circulation, which is good for your clothes, and better visibility of stored items.

These types of systems can take the better part of a day to install, depending on their complexity. They can be configured in a number of ways, depending on your storage needs.

### Custom Installed Systems

At the luxury level are custom closet systems which can be designed for your needs and preferences. With a professional installation you can usually expect

an in-home visit scheduled at your convenience, with an evaluation of your requirements.

After a complete inventory of your wardrobe, you will receive a design customized to your needs supported by drawings and a firm price quote.

With a professional installation you should expect higher quality materials, better use of space and extras that make an ordinary closet extraordinary. Even after your system is installed you can move shelves and wardrobe rods or add additional items. Your system will never go out of style.

### Conquer your space

If yours is like most homes, closet space is usually scarce. The "one shelf – one rod" closet simply does not meet many people's growing needs. You lose the most space under the single shelf and pole.

Alot of space is wasted between where the clothes stop and the items on the floor start.

Custom organizing systems are an ideal way to create extra storage space for any room in the house. With a variety of frame widths and heights you can design a system for the garage, family room, office, laundry room, basement, linen and pantry, utility room or workshop. They can be installed anywhere you need to get organized.

When you de-clutter a room it actually makes the room that much more relaxing. Being organized helps take stress out of your life.

As with any "measurable" improvement you will receive a good return on your investment. It's truly amazing how much more space you can create. You'll feel like you have a whole new house.
